

PRIVATE SUITE TRANSITION CARE

Rehab to Home Program

Stronger. Safer. Home Sooner.

Private rehabilitation rooms for adults recovering after a hospital stay. Skilled therapy and nursing care, paired with the comfort, privacy, and independence of a space that feels like your own.

Your Bridge Between Hospital and Home

Patients often leave the hospital before they have the strength to safely return home. The Rehab to Home Program closes that gap. Each guest gets a private room, a dedicated therapy and nursing team, and a discharge plan built around one goal: getting home, safely and for good.

Private Suites

A spacious private room for the full length of stay. Your space, your care, your routine.

Goal Focused

A full rehab and nursing team dedicated to recovery and a safe, timely discharge.

Supportive

Individualized care plans that continue as outpatient therapy after discharge.

FOR HOSPITAL CARE TEAMS

A Discharge Option That Reduces Readmission Risk

- Private-room transition care built for patients who need more recovery time before returning home
- 24/7 skilled nursing plus daily PT, OT, and speech therapy on site
- Discharge planning starts on day one, including equipment, home care, and family education
- Direct line for case managers and discharge planners to confirm availability

FOR PATIENTS & FAMILIES

Recovery in a Space That Feels Like Home

- Your own private room, with room for family to visit and stay part of your care
- Skilled nursing staff and therapists available around the clock
- A calm, quiet space built for rest and healing, not a shared facility floor
- A clear, guided path back to independent living

Services That Cover Every Part of Recovery

Physical Therapy

Rebuild strength, balance, and mobility to return home with confidence.

Skilled Nursing 24/7

Around-the-clock nursing for wound care, medications, and pain management.

Discharge & Home Planning

Planning for equipment, home care, and follow-up needs starts from day one.

Occupational Therapy

Support for daily living skills, speech, memory, and swallowing after stroke or illness.

Personalized Recovery Plan

Goals set with you and your physician guide the care team's daily focus.

Family Education

We prepare everyone involved in care for what to expect before discharge.

Your Path From Hospital to Home

1

Welcome & Assessment

Your team reviews your history and sets recovery goals with you.

2

Daily Therapy

Physical, occupational, and speech therapy build strength and skills.

3

Progress & Training

We track your gains so home feels safe and ready for your return.

4

Home With Support

You leave with a plan for equipment, home care, and family education.

Who Is This Program For?

Built for people who need real skilled care to recover, on their own terms, in their own space.

Leaving the Hospital

Needs Skilled Rehab

Wants Independence

Heading home after surgery, an illness, or an injury, and needs time to recover well.

Requires physical, occupational, or speech therapy and skilled nursing care.

Prefers a private, comfortable room over a shared skilled facility space.
